

Rainhead

- Improves the quality of harvested rainwater
- Prevents mosquitoes from entering while still allowing adequate water flow
- Suitable for 110mm, 80mm and 75mm pipes
- Unique plastic screen prevents rust
- 180-degree pivot head allows for installation at any angle
- Angular design of filter screen allows for self-shedding of debris with each rainfall
- Easy to install
- Minimal maintenance required

Directs leaves and debris away from the flow of water when harvesting rainwater

Specifically designed for the South African climate and plumbing pipe sizes, our one-of-a-kind rainhead is versatile and ideal for any setup. Simply install it underneath your downpipe and use either a 110mm, 80mm or 75mm plumbing pipe to feed the rainwater into your water storage tank.

Pair with our First Flush Rainwater Diverter

We have more than one pre-filtration accessory available, how many you choose to install depends on the setup and personal preference. Keep in mind the more installed the better the quality of the harvested rainwater will be.
