

20mm Water Tank Fill Valve

- **Adjustable:** Allows for variable minimum and maximum water levels ranging from 50mm to 2.5m.
- **Reduces Pump Wear:** The pump only switches on when the water reaches the minimum level set, limiting pump start/stop cycles and saving on electricity usage.
- **Supplied in Kit Form:** Includes a 40/20mm reducer to make connection to your JoJo tank inlet as simple as possible.
- **Reliable:** Simple yet effective to ensure dependable performance.

Flow Rate and Pressure Range

- Handles flow rates of up to 200 litres per minute.
- Suited for pressure ranges between 1 to 10 bar.

For effortless control of your tank's fill level

Say hello to smoother, smarter water management with our new fill valve. Ideal for municipal and pump-fed backup water systems, this adjustable valve offers effortless control of your tank's fill level and reduces pump run time to protect your pump and save on electricity usage.

Product details

- **Item code:**
20MMFILLVALVE
- **Packaging dimensions in mm:**
153(h) x 273(w) x 90(l)
- **Total weight:**
700 g

Pack contents

- 20mm Fill Valve
- Plastic Floater and Cord
- Min and Max Level Stoppers
- 40/20mm Reducer

Availability

Stock Item:

Stock items are subject to a 7 day calendar lead time

Things to note

We recommend installing the valve at your tank's inlet and to install a ball valve to isolate the supply for maintenance purposes.
